Jr. Club Has Fashion Show

The December Meeting of the Junior Womans Club of Appomattox was held at the Court House Tuesday evening, December 12th.

After a short business meeting, presided over by Mrs. Betsy Carter, Club President, the program was presented by the Conservation Department.

The primary objective of the Conservation Department is the promotion of education on environmental and conservation problems and needs of the community and nation. The two part program, therefore, was coordinated with this objective. The first part of the program consisted of a slide presentation on the National Park Service's Environmental Study Area used by the Life Science students of the intermediate school. The club plans to assist on the field trips to this area in the spring, and it was felt it would be beneficial to the membership to be as informed as possible regarding the area.

The second portion of the program was the presentation of a fashion show on air pollution. Though a "tongue in cheek" type presentation, it was designed to be an informative introduction to the six major pollutants that can exist in our air and the damage they can produce on property and the health of animals and human life.

Participants in the fashion show and the pollutants they represented were as follows: Miss Hydro Carbons Mrs. Rachael Lee; Miss Osicants (Photo Chemical Smog) Mrs. Anne Robinson; Miss Particulates Mrs. Ann Kerr; Miss Nitrogen Oxides Mrs. Betsy Carter; Miss Carbon Monoxide Mrs. Frances Lewis; Miss Sulfur Oxides Mrs. Judy Deavers. Moderator for the fashion show, and chairman of the Conservation Department, was Ginny Fedison.

Refreshments were provided after the program presentation by the hostesses for December: Miss Beverly Davidson, Mrs. Beverly Peoples, Mrs. Wanda Doss, Mrs. Billie Carter, Mrs. Nancy Keffer, Mrs. Doris Nash.

Vepco Asks For Increase In Gas Rates

Virginia Electric and Power Company today filed revised gas rate schedules with the Virginia State Corporation Commission which would produce additional revenues of $1.8 million based on the test year ending June 30, 1972.

Vepco's application for an increase in gas revenues marks the company's first effort in 19 years to seek a general rate increase from its gas customers. The SCC has set a hearing on the proposal which is scheduled to begin December 15.

The company requested that the proposed rate schedules be substituted for those filed with its application on August 9 which would have produced $2.4 million in additional revenues.

Vepco President T. Justin Moore, Jr. said, "Based on studies conducted since our original application for an increase in gas rates, we have concluded that the new schedules will be sufficient to meet our needs."

Under the proposed rates, a typical residential customer with gas heat using 154 ccf* of gas per month during the winter would pay $1.44 more than the $24.33 he would pay without the increase.

The company included in its request a provision for interim monthly billing for its gas customers similar to that now being used by electric customers. It also requested a minimum charge of $3 for all residential customers. The present minimum is $1.50.

The company's testimony for the case, which was also filed today, indicated that the proposed rate schedules will provide a nine per cent rate of return on investment.

In the testimony filed with the application, L. L. Eley, vice president, said the return now being earned on the company's gas operation is inadequate.

Mr. Eley said from 1953 to 1972 a commonly used indica-

tor of gas construction costs increased 218 per cent. During that same period, Vepco's gas rates have not been adjusted to reflect rising construction costs.

"The company's gas operation should make an appropriate contribution to its overall return, and the granting of the relief requested will give the company the opportunity to obtain this result," Mr. Eley concluded.

Vepco supplies gas to more than 120,000 customers in the cities of Norfolk, Chesapeake, Virginia Beach, Hampton, Newport News, Williamsburg and in the counties of James City and York.

In July, the company filed for increased electric rates in North Carolina and West Virginia. The company has also announced plans to seek a revenue increase from wholesale customers under the jurisdiction of the Federal Power Commission.
